THE WORLD OVER

R.B. BENNETT OPENED MEETING
BRITAIN MAY SETTLE DISPUTE
BERRY CREEK FARMERS LEAVE

LONDON—Prime Minister R.B. Bennett of Canada made an opening speech on Monday before a wheat conference of 31 nations which hopes to come to a world agreement on wheat production by the "barley" wheat-producing nations. Leaders in the conference are Canada, the United States, Argentina and Australia. Australia's first proposal to settle a crop control plan that forced the previous conference to adjourn without reaching a definite conclusion.

The principle on which the conference is meeting is that each agrees to limit production as a means of absorbing the world carry-over, then the importers nations must agree to remove restrictions by other means.

The producer nations already have the assurance of the United Kingdom the largest wheat-importing nation in the world, that she will co-operate in any workable scheme.

BAGHDAD, Iraq.—Great Britain, although it gave up its mandate over Mesopotamia two years ago, has taken a hand in the affairs of this state in an attempt to bring peace between Assyrian Christians and Iraqi troops.

The killing of more than 600 Assyrians in recent days, and the British forces' retreat from the Tigris two weeks ago and wiped out a force of Iraqi troops.

They now claim that the British massacred the Assyrian communists.

EDMONTON—Leading of railway freight cars with settlers' effects has commenced in the Berry Creek area, the settlers moving from the drought areas of Alberta to the more northerly districts. Leaders in the town of Coalfield, Ponitelli, and Sunnyside.

Some of these moving are going to Gadsby, Elmira, Bawlf and other points. It is said that the maximum to move from this area would be 250.

EDMONTON—Sales of grain futures with settlers' effects have commenced in the Berry Creek area, the settlers moving from the drought areas of Alberta to the more northerly districts. Leaders in the town of Coalfield, Ponitelli, and Sunnyside.

The man who advertises believes in the goods he sells, and he believes in the people he deals with and expects them to believe in him, his service, his prices and the goods he sells. He believes in his town, and in the good people he meets there. He believes that it is a good place to live in, and the people are good to do business with. He believes in co-operation with his neighbors and his business associates, and in the welfare of his townsmen. He advertises to help his own business and the business of everyone else in the town and to do his part in supporting the district with good news items, and to help his newspapermen earn a decent living.

With our advertisers, we are a good newspaper in an area to any town. Well patronized newspapers are good newswriters.

The Three Hills Club is to be congratulated on their fine win, and have the makings of a strong team.

Several of their members went to three, and were closely connected to the last point involved.

The following are the results and scores:

Men's Singles—M. Hollonquist, of Three Hills defeated W. Foxon, Carbon, 6-4, 6-4, 6-2.

Men's Doubles—H. Edwards, Carbon, 6-3, 6-2.

Ladies' Singles—Miss H. Collier, Three Hills, defeated M. Ramsay, Carbon, 6-0, 6-4, 6-3.

Men's Doubles—W. Foxon and H. Edwards, Carbon, defeated M. Hollonquist and D. Remie, Three Hills, 6-4, 6-0.

Men's Doubles—G. Ramsey, Carbon, defeated T. Smith and M. Witwer, Three Hills, 6-4, 6-2.

Ladies' Doubles—Miss H. Collier and Mrs. Remie, Three Hills, defeated Miss A. R. Reed, Carbon, 6-2, 6-4.

Mixed Doubles—S. Nash and Miss M. Ramsay, Carbon, defeated D. Remie and Mrs. Remie, Three Hills, 6-2, 6-4.

GRANITE STONE AGAIN FIXED AT
1.30 CENT PER BU. PER DAY.

The Board of Grain Commissioners has issued regulations effective Sept. 1, restoring the maximum rate for storing grain at 1.30 cent per bushel a day. Last November this rate was reduced to 1.45 cent per bushel a day in keeping with the low prices obtained for grain.

Father—Well, I can't see why you don't like Horace. He's so intelligent—why, he's like a walking encyclopaedia.

Daughter—Yes, but I'd rather have somebody with a car.

HIGH SCHOOL STUDENTS PASS 62% OF UNITS

The high school students have been shown that Carbon High School students pass in 32 subjects out of the 46 written, making a 62 per cent showing.

The following is a list of the marks obtained by each pupil in the various subjects.

GRADE X

William H. Moore—Art I, 41; History II, 55; Algebra II, 11; Geography I, 23;

Samuel Poxon—Art I, 53; History II, 23; Algebra II, 44; Geography I, 23;

Wilfred Skerry—History II, 50; Alge-

bra II, 68; Geography I, 35.

Elizabeth Johnson—Art I, 49; His-

tory II, 15; Algebra II, 34; Geogra-

phy I, 15.

GRADE XI

Sylvia Atkinson—Literature 3, 45; Arith-

metic I, 65; Geography I, 50; Chem-

Istry I, 42; French 2, 59.

Edna Gibson—Literature 3, 52; Com-

position 3, 51; History 3, 45; Arithme-

tic I, 44; Geography I, 50; Chemistry I, 52; French 2, 59.

Paul Greenan—Literature 3, 41; Arith-

metic 3, 51; History 3, 51; Arithme-

tic 3, 51; Geography I, 40; Chem-

Istry 1, 52; French 2, 59.

AN ODE TO THE CARBON BOYS

The following was received from an anonymous writer by mail, and although we usually decline to publish articles without the writer's name and address, we see no cause for offence by anyone.

(By an anonymous girl.)

Please excuse that amateur strain

Makes you perfectly madish.

From the look of you, I guess

It took you quite a while to dress.

That rig, in which you cut a dash,

Makes you just a perfect hash.

With your clothes all torn to shreds,

From some gorgeous fashion plate,

Pants, with such a perfect crease

(Forgive me if my audience increase).

Ties, of dots and stripes a blare,

With your shirt all torn to shreds,

With your socks all torn to shreds,

With your shoes all torn to shreds,

With your hat all torn to shreds,

With your coat all torn to shreds,

With your pants all torn to shreds,

With your shirt all torn to shreds,

With your socks all torn to shreds,

With your shoes all torn to shreds,

With your hat all torn to shreds,

With your coat all torn to shreds,

With your pants all torn to shreds,

With your shirt all torn to shreds,

With your socks all torn to shreds,

With your shoes all torn to shreds,

With your hat all torn to shreds,

With your coat all torn to shreds,

Lessons Of The World Grain Show.

The great World Grain Exhibition and Conference has become a matter of history, but to the thousands of visitors who were privileged to view its wonderful display it will long be remembered as one of their most delightful and instructive experiences. Western Canadians, in particular, who had never had the opportunity of visiting the other provinces of their own Dominion must have been deeply impressed with the variety, magnitude and completeness of the exhibits, from the lumber to the hardware through the various permanent exhibits, presented concerning the future of the country.

A tour of the British Columbia exhibit could not fail to have impressed one with the amazing wealth of resources in that great province. Divided into three sections, the exhibit depicted first the forest and mineral wealth of the Pacific Coast province; then the magnificent fruit products, with their attractions to the tourist; and finally the fisheries whose products are known and in demand the world over.

Or, jumping over the prairie provinces and into Ontario, the visitor found not an amazing display of manufactured products from that great industrial province, but they were impressed with the wealth which is being produced from the mines of the province, indicated by the thousands of tons of mineral of minerals on display. They learned how Ontario was progressing with a vigorous reforestation policy to maintain its forest wealth, how forest fires are fought, and other steps taken to conserve this great natural resource.

Studying the Quebec exhibit, depicting the quiet pastoral life of the people away from the industrial centers, did not fail to get a new understanding of the agricultural province and to realize the important influence it is bound to exert upon the national life of the Dominion. The teeming commerce on the mighty St. Lawrence, its great maritime ports, with the next, intensively cultivated farms stretching back from the river banks, all conveyed a picture of beauty, strength and progress, the homes of civilization.

To visitors from other provinces and countries, the exhibits of the prairie provinces must have been a revelation indeed. Holding the view, as undoubtedly many such visitors did, that these provinces produce nothing but grain and other agricultural products, they certainly had their ideas expanded. Manitoba devoted its exhibit to a display of the wild bird and animal life of the prairies, while Saskatchewan's prairie fields to the Arctic circle. It was one of the show exhibits of the exhibition and people stopped before it in interest crowds lost in admiration.

Alberta demonstrated that it could grow wheat by carrying off the world's wheat championship, but it also let visitors know that 14 per cent. of all the coal used in the province is generated within its borders; that it produces over 1 million pounds of beet sugar daily; that its lakes and rivers teem with fish, and other facts which were very large.

And Saskatchewan, popularly known as the "bread basket" of the Empire, which in normal years produces more than one-half of all the wheat grown in Canada, and more than any other single province or state in the United States, demonstrated that it can grow a variety of crops from its limited regions, its many varieties of fish, and big fish at that which would do credit to a province by the sea, its mineral wealth of coal and clays in the south and richer metals in the north, its wild bird and animal life, its scenic beauty spots.

The unique aspect of the prairies as far, interesting details of growth and nothing else, was displayed by the many wonderful exhibits given to the people living on these prairies they were a revelation. And to unite the whole were the comprehensive exhibits of the Dominion Government revealing in all their richness and variety the magnitude of the resources of the Dominion.

And the recall to mind now the exhibition is that "why?" Because one of the objects of the exhibition was to bring this knowledge in its most interesting and fascinating and compelling form to the people of Canada and the world. Seeing is believing, and those who saw Canada on parade at Regina cannot fail to have been impressed and convinced of the development and prosperity that the future has in store for this Dominion, and for our part of the world.

And this conviction was reinforced by the visits to the past which were also afforded. One had only to stick their head through the window of the old Hudson Bay trading post and examine its contents, or gaze upon the means of transportation in the days of the early traders—not very long ago at that—when the Indians were the chief means of communication, trust them with the great Hudson Bay stores at Winnipeg and Calgary, to mention only two, and with the C.P.R. and C.N.R. exhibits and the automobile exhibits of modern means of transportation, to appreciate the fact that Canada has made amazing progress in the short span of its national existence. Such progress offers but a glimpse and a promise of the still greater progress to come.

Thus in the midst of a depression which has to some extent at least shaken the confidence of many of our people, the World Grain Exhibition came with its wonderful and many beautiful story. It also brought a message. It is not a message of despair, but of hope. A message that, trying and often failing, man may take up his tools again, after all, and prosperously because a nation with such resources, with such virtues, with such energy and progressive people cannot fail to surmount any and all difficulties. Canada is for the moment caught in the maelstrom of world events and conditions beyond our control, but it will win through and rise to greater, greater heights than ever before.

Cum booms formed an important item of Canadian export to New Zealand during the first three months of the current year.

The word "tax" we are told, comes from the Latin "taxare" meaning "to touch sharply." No further wiser crack is needed.

The world is too small for the man who knows it all.

Bowel Complaints of Children During the Summer Months

Mother should look well after their children during the summer months, as they are more liable to catch colds, diarrhoea, summer complaint, or other forms of bowel trouble.

There is a remedy in Dr. Fowler's Extract of Wild Strawberry; a remedy that has received the endorsement of the medical profession for 88 years it has been on the market. Don't experiment. Get Dr. Fowler's and be on the safe side.

Manufactured only by The T. Miller Co., Ltd., Toronto, Ont.

A letter enclosing payment for taxes in Enfield, Australia, has just been delivered to the tax office in Enfield, England.

A clever scientist claims to have devised a means of producing rain at will. We still prefer the old English method of holding a picnic.

Argentina's use of tobacco is increasing rapidly.

Judge Fines Himself.

Makes Penalty Light Because It Was His Birthday

Under the Chicago system, judges take turns sitting in the various courts, and a recent Monday was Judge J. H. Holland's first experience in the traffic division.

Immediately after Holland took charge, the clerk announced the first case as follows:

"U. S. of Chicago vs. Eugene J. Hartman."

Judge Holland sat up very straight and very suddenly.

"What's this?" he asked of the clerk, thinking perhaps that a joke was being played on him to initiate him into his new environment.

The clerk explained that the case involved a parking charge which was several days old. Holland then recalled that he actually had received a parking ticket.

"I really feel I must write and tell you that, after taking Kruechen's case, I am not going to be lenient," he said. "I have got his weight down from 230 lbs. to 205 lbs. This has been achieved by both diet and exercise. I have been healthy also, and I started taking Kruechen off three weeks ago. At 205 lbs. he got down to 193 lbs. and at 193 lbs. we are delighted."

"We are delighted."

"I am not going to be lenient."

Broomhall Declares Canadian Wheat Will Always Be At A Premium In Markets Of World

Canada's wheat still stood supreme at the world's grain show and conference came to a close at Regina.

Following the biggest year of the \$100,000 wheat prizes, the 100 million farmers saw their banner at the top of the mast, with hopes rising that demand for Canadian wheat from foreign countries would continue to grow. Exporters who attended the conference gave farmers encouragement in disclosing European countries wanted the Canadian grain.

The big share of the prize money from all cereals went to the Dominion. Its growers took \$44,713, more than double the \$23,526 which went to United States growers and \$8,221 won by farmers in countries other than Canada and the United States. Approximately \$2,000 of the prize money was not awarded because judges felt some entries were not worthy.

A survey of Canadian wheat of approximately 200,000,000 bushels, at the cereal year ended July 31, compared with 12,962,961 bushels in the same date at the close of the previous year, 1931, was a problem for farmers to consider in view of their home-raised wheat.

But the Canadian growers were given assurance it was not the lack of quality in their product that kept it from being popular. They were told that the market was held by the French, who had won the competition in Turkey in 1931, in their sight from New York to Istanbul, Turkey, or 5,012 miles.

Decrease In Production

Output Of Six Leading Minerals Down For First Five Months Of Year

Size of Canada's leading minerals decreased production figures for the first five months of the year, but it was reported by the Dominion Bureau of Statistics that the late Russian Bolshevik and John Poland in 1931, in their sight from New York to Istanbul, Turkey, or 5,012 miles.

All miners, Broomhall declared, did not and could not buy Canadian wheat because of high duties and milling restrictions of the producing countries. Most wanted Canadian wheat, and the message was told to the Canadian wheat farmers.

Let us now turn to the newly crowned wheat king, Fred Wulford, of Stavely, and the noted northern grower, Peter Tamm, of Wembley, Alberta captured the greater share of the prize money going to Canadian wheat. Alberta's award was \$16,152, while \$14,000 went to the total amount won by United States farmers.

Saskatchewan was second in the list, receiving \$12,380, while British Columbia, Ontario, \$11,429; Quebec, \$7,935; Manitoba, \$5,603, while the balance was spread between Quebec, New Brunswick, Prince Edward Island and Nova Scotia. Exports of wheat either to the United States and the United States went to Australia, \$6,766; Siam, \$741; British Guineas, \$200; New Zealand, \$100; Ireland, \$150; England, \$91; Scotland, \$44; Southern Rhodesia, \$44; India, \$34.

The curtain rang down on the greatest grain show ever held in the Dominion, while proposals were being made to establish a permanent branch of the Federal Department of Agriculture to assure similar events at future times. Another world's show for the Dominion, probably some where in the eastern provinces, is being suggested for 1938.

Fisheries Production

Had An Aggregate Of Nearly \$200,000,000 Last Year

Canada's fisheries production in the calendar year 1932, as shown by statistics prepared and published by the Dominion Department of Fisheries and the Dominion Bureau of Statistics jointly, had a market value of \$200,000,000, which may be put at \$22,997,133. Of this total, \$21,763,113 came from sea food products and \$4,194,026 from the inland or freshwater fisheries.

This year's aggregate was \$14,600,135 less than the 1931 total, and the falling off is explained, of course, by the reduced world market conditions which prevailed. Fish were as plentiful as ever in Canada's vast extensive fishing water, but marketing was difficult. Prices, low, the Dominion's fisheries figures will climb again as normal world conditions return.

Fisheries production value showed a drop of 25 per cent each in 1931 and in the Yukon Territory in 1932, although in Alberta there was a drop of 10 per cent, and in Quebec and the Manitoba decrease was relatively small. By provinces, the market value was:

British Columbia	\$9,900,116
Nova Scotia	6,557,943
New Brunswick	2,972,706
Ontario	2,040,662
Quebec	1,815,544
Manitoba	1,204,662
Prince Edward Island	1,000,000
Saskatchewan	186,174
Alberta	155,789
Yukon Territory	26,060

Olive oil produced in Spain this year is expected to weigh 440,000 tons, the largest in years.

Canada's export market for raw materials in Japan is gradually increasing.

In far northern Siberia the ice does not break up in the rivers until June.

Record Shattering Flight

Some Of The Elements Listed Which Contributed To Success

With Captain J. C. Gatty and Paul Codres, the Frenchmen, set off \$100,000 piece of flying machinery down in Syria after a record-shattering flight from New York, they could well give thanks to the following:

"To take off safely under the heaviest fuel load ever carried by a single-motor plane, nearly seven tons."

"A number of factors."

"The skill of D. Chamberlin, pioneer trans-Atlantic flier himself who designed the runway, but modestly refused to talk much about the part it played in the flight, summarized the factors that led the Frenchmen to win through."

"The instruments are the thing," Chamberlin said. "In this flying business."

Squadron Leader Oswald R. Gaye and Flight Lieutenant Gilbert M. Nicholls, last February flew 5,340 miles from Cranwell, England, to Walmer Bay, southwest Africa.

They had been invited to compete in the late Romanian-British and John Pollock in 1931, in their sight from New York to Istanbul, Turkey, or 5,012 miles.

Cheaper Than Detective

Britis Police Furnish Personal Information For Twelve Cents

It costs only 12 cents to find out all about the lady in Berlin. Whether she is a widow (or more accurately, widower, down-shaker) in France to hire private detectives or bribe janitors in order to ascertain whether she is single, married, divorced, 21, or 48, rich or poor—the shipping, telephone, telegraph, under new regulations, furnish all the information for 50 pennings.

Being German police, and therefore thoroughness personified, they keep tabs on everybody. And being German, they are not sentimental, they will not only divulge the above-mentioned data, but come through with her religion, birthplace, and maiden name.

What the lady can do to get even can do the same. She may obtain, for the same fee, the gentleman's full name, profession, parents' names, and previous residence. If he has real property, she is entitled to know that too.

To prove that sophisticated Berliners are just as inquisitive as small-town folk, written personal requests for information of this sort in the past, under more stringent regulations, averaged 500,000 a year.

"The instruments are the thing," Chamberlin said. "In this flying business."

Squadron Leader Oswald R. Gaye and Flight Lieutenant Gilbert M. Nicholls, last February flew 5,340 miles from Cranwell, England, to Walmer Bay, southwest Africa.

They had been invited to compete in the late Romanian-British and John Pollock in 1931, in their sight from New York to Istanbul, Turkey, or 5,012 miles.

Decrease In Production

Another world's show for the Dominion, probably some where in the eastern provinces, is being suggested for 1938.

Professor Met His Match

Quick-Witted Student Found Flaw In His Deduction

The professor thought he was clever, but one day he met his match. "Arithmetically," he commenced his lecture, "there is a science of truths. Figures cannot lie. For instance, if one man can build a house in one day, twelve men can build it in one day."

A quick-witted student rose to his feet. "Yes," he said: "then 288 men could build it in one day, 17,280 in one minute, and 1,000 in one second. I'm sure one of them couldn't lay a brick in that time."

While the class and the professor were still gasping the student went on: "If one ship can cross the Atlantic in six days, six ships can cross it in one day. That's not possible, either."

Production Of Foot Wear

June Output Was The Largest Since 1929

The June production of leather footwear in Canada at 1,965,647 pairs, was the largest output recorded for any month since January, 1929, a Dominion Bureau of Statistics report says. That figure represents an increased 211,083 pairs of 12 per cent over the preceding month and an increase of 406,455 pairs or 26 per cent for the corresponding period last year.

Exports of leather footwear in June last amounted to 2,081 pairs, an increase over the preceding month of 1,650 pairs and an increase of 776 pairs over June, 1932.

Olive oil produced in Spain this year is expected to weigh 440,000 tons, the largest in years.

Canada's export market for raw materials in Japan is gradually increasing.

In far northern Siberia the ice does not break up in the rivers until June.

Cheaper Than Detective

Britis Police Furnish Personal Information For Twelve Cents

It costs only 12 cents to find out all about the lady in Berlin. Whether she is a widow (or more accurately, widower, down-shaker) in France to hire private detectives or bribe janitors in order to ascertain whether she is single, married, divorced, 21, or 48, rich or poor—the shipping, telephone, telegraph, under new regulations, furnish all the information for 50 pennings.

Being German police, and therefore thoroughness personified, they keep tabs on everybody. And being German, they are not sentimental, they will not only divulge the above-mentioned data, but come through with her religion, birthplace, and maiden name.

What the lady can do to get even can do the same. She may obtain, for the same fee, the gentleman's full name, profession, parents' names, and previous residence. If he has real property, she is entitled to know that too.

To prove that sophisticated Berliners are just as inquisitive as small-town folk, written personal requests for information of this sort in the past, under more stringent regulations, averaged 500,000 a year.

"The instruments are the thing," Chamberlin said. "In this flying business."

Squadron Leader Oswald R. Gaye and Flight Lieutenant Gilbert M. Nicholls, last February flew 5,340 miles from Cranwell, England, to Walmer Bay, southwest Africa.

They had been invited to compete in the late Romanian-British and John Pollock in 1931, in their sight from New York to Istanbul, Turkey, or 5,012 miles.

Decrease In Production

Output Of Six Leading Minerals Down For First Five Months Of Year

Size of Canada's leading minerals decreased production figures for the first five months of the year, but it was reported by the Dominion Bureau of Statistics that the late Russian Bolshevik and John Poland in 1931, in their sight from New York to Istanbul, Turkey, or 5,012 miles.

All miners, Broomhall declared, did not and could not buy Canadian wheat because of high duties and milling restrictions of the producing countries. Most wanted Canadian wheat, and the message was told to the Canadian wheat farmers.

Let us now turn to the newly crowned wheat king, Fred Wulford, of Stavely, and the noted northern grower, Peter Tamm, of Wembley, Alberta captured the greater share of the prize money going to Canadian wheat. Alberta's award was \$16,152, while \$14,000 went to the total amount won by United States farmers.

Saskatchewan was second in the list, receiving \$12,380, while British Columbia, Ontario, \$11,429; Quebec, \$7,935; Manitoba, \$5,603, while the balance was spread between Quebec, New Brunswick, Prince Edward Island and Nova Scotia. Exports of wheat either to the United States and the United States went to Australia, \$6,766; Siam, \$741; British Guineas, \$200; New Zealand, \$100; Ireland, \$150; England, \$91; Scotland, \$44; Southern Rhodesia, \$44; India, \$34.

The curtain rang down on the greatest grain show ever held in the Dominion, while proposals were being made to establish a permanent branch of the Federal Department of Agriculture to assure similar events at future times. Another world's show for the Dominion, probably some where in the eastern provinces, is being suggested for 1938.

WORLD HAPPENINGS BRILLY TOLD

Decine of 21,500 in the number of persons on relief in British Columbia between March and June of this year, is recorded in official figures released.

Crow's Nest Pass Coal Company of Fort Macleod, Alta., has the entire contract of the Winnipeg Electric Company for coke, amounting to 60,000 tons a year. Formerly United States supplied Winnipeg first.

Three white Leghorn chickens, owned by Harry Knapp, have been sent from San Jose, Calif., to Roma, Italy, where they will be exhibited in the world's poultry congress.

British Columbia lumbermen, particularly sawmill manufacturers, are perturbed over possibility of all being placed on a list of products by United States under the new recovery act code.

Because of the increasing importance of Canada in American nations, in Japan's foreign service, the foreign service is planning to establish a new affairs bureau to handle dealings with nations in north, south and central America.

This year's cotton production in the United States will be forecasted by the Department of Agriculture at 21,000,000 bales of 500 pounds gross weight, compared with 23,000,000 bales last year.

John McPhee, 72, veteran of the Riel Rebellion, died at Victoria recently. A native of Cork, Ireland, he came to Canada in 1883 and for many years owned a cattle ranch at Jumping Point, Alberta. He has been a resident of Victoria since 1911.

Britain's dissatisfaction in reducing her navy by much more than 50 per cent. since the war had been ignored and it was time she returned to safety. Earl Jellicoe, former admiral of the fleet, declared when he opened naval week at Portsmouth.

Naphtha, previously wasted, is being rescued by the new Imperial Oil absorption plant in the Turner Valley oil fields, to turn 50,000 barrels a day of residual oil into producing waste's output. A total of 80,000,000 cubic feet of waste gas is being run through the new plant daily, from which the valuable naphtha is obtained.

Establish Weather Depots

Plan New Meteorological Stations Throughout the West

Proposals for the establishment of new meteorological stations throughout the west and for the providing of competent inspectors to provide accurate weather information for application to agriculture, are receiving the attention of both the federal and provincial governments.

Plans for the establishment of such a service were laid at a conference of federal and provincial authorities held in Regina, and announcement of them was made by Hon. G. B. Bryant, M.C.A., minister of state for communications on conservation and afforestation, and chairman of the joint commission of the three prairie provinces.

The proposed embassies, or establishing a network of meteorological stations throughout the west equipment at the federal expense, for family and maintenance of the services, will be maintained by the provincial governments. The data and reports of these stations will be collected by day from similar stations, located at strategic locations, in order to have records from all areas of the provinces concerned.

Peasant Had Good Idea

Early Solved Problem Of Water melon Surplus In Bulgaria

Overproduction of watermelons has been solved by the peasants near Pernik, Bulgaria, who have now economists for advice. To the next neighboring village of St. Constantine come the peasants with their full load of watermelons. The peasants, who have more than they can eat, sell them to the market, remain to trees in the woods and deposit them there. Over the box is a sign: "Free to all who wish and leave as much money as you wish." Free fall to pay a reasonable sum, and the melon shop does a thriving business and no racketeers have yet robbed the till.

A Godsend To Schoolboys

Recent Invention Is Wonderful Ma- chine Which Solves Equations

One of the most remarkable of recent scientific inventions is R. M. Mattick's invention of a machine which solves simultaneous equations. It consists of a series of series of transformers each with a series of windings. By adjusting the number of turns in each winding, and passing an electric current through one of the transformers, the machine is made to function. The solution of the equations may be read off directly by twirling a series of dials. As many as ten equations can be solved simultaneously.

A Novel Wireless

Conference Telephone Used At Stock
Exchange Amongst To
Businessmen

At the World Power Conference held in the Stockholm concert house a striking technical novelty was introduced enabling audiences at conferences to listen to lectures in several halls simultaneously while moving about and without being disturbed by noises or by conversations between bystanders.

This new development, or conference telephone, constructed by the L. M. Ericsson Telephone Company, is a portable wireless receiver outfit of tiny dimensions consisting of a cell antenna, placed around the shielded aerial, and a small speaker in a pocket and a hand phone. The transmitter is mounted around the walls of the conference room, so that the audience in the receiver outfit can move about, listen to the lecture while undisturbed by conversation of other members of the audience.

Another great advance is the power of interpreting a lecture in different languages simultaneously. The interpreters sit in an adjoining room and send their interpretations over different wave-lengths for each language. The listeners only has to turn his set to the wave-length of the language he prefers to hear. This will naturally greatly shorten the duration of the presentation of an elegant section of the distribution of knowledge encountered at conferences when using the costly and complicated method with fixed telephone receivers at each seat with cords that are apt to get entangled and cause trouble.

The revolving innovation was enthusiastically received by the 600 members of the conference, who also admired other electric installations, including signal lights, and the use of different languages used with an automatic telephone system between the conference officials.—St. Thomas Times-Journal.

Recipes For This Week

(By Betty Barclay)

MARVEL LEMON PIE

1 package lemon-flavored gelatin
Gelatin and juice of 2 lemons
2 eggs
1/2 cup cold water
1/2 teaspoon salt
1/2 cup granulated sugar, salt, and cream
Custard powder, vanilla, and cornstarch
Cover with 3 tablespoons water
Price: 20 cents in stamps or coin (coin is preferred). Wrap carefully.

Three Minute Meringue

2 egg whites, unbeaten.
2 tablespoons water.
1/2 cup sugar.
Dash of salt.
Few drops vanilla or almond extract.

egg whites, sugar, salt, and water to upper part of double boiler; beat until stiff, then add gelatin thoroughly mixed. Place over rapidly boiling water, add salt, and pour mixture over custard, stirring until thickened. Turn into cold pie shell. Chill. When cold, cover with Three-Minute Meringue or top with whipped cream.

PEACH PIE GLACE

8 (4 cups) fresh peaches, sliced,
drained, and drained.
1/2 cup sugar.
1/2 cup boiling water.
1/2 cup granulated sugar.
Dash of salt.

Custard peaches and sugar and let stand 10 minutes. Dissolve gelatin in boiling water, add salt, and pour over peaches, stirring until mixture cools. Chill until slightly thickened. Turn into cold pie shell. Chill. When cold, cover with Three-Minute Meringue or top with whipped cream.

Grain Exhibition

Formation of an international organization to promote the world's Grain Exhibition and Conference is expected.

The formation of the grain show in Germany has spurred international interest to new planes.

It is understood that the federal government, through its department of agriculture, would set up a small committee to work out the details for the formation of the body.

World's First Line Speaks

Formation of an international organization to promote the world's Grain Exhibition and Conference is expected.

The formation of the grain show in Germany has spurred international interest to new planes.

On May 1 an average of five calls a day have been made from Bonn.

363

A SMART DRESS—SLENDERNESS AND CHARMING

It is amazing at how easily it is fashioned.

The slender, slim cut can be worn by the lower skin of John, but it is marvelously toward slimness. It can be belted if you wish. Horizon belt is very becoming.

And note the flatness of the hipline. The pointed outline at back is front.

Navy blue crepe silk so lovely for street, made the original. The trim is a lace border.

Style No. 363 is designed in sizes 36, 38, 40, 42, 44, and 46 inches.

Price: \$10.00. Made of 35-inch contrasting material.

The woolens are nice medium.

Price of pattern 20 cents in stamp or coin (coin is preferred). Wrap carefully.

OCCASIONAL WIFE

EDNA ROBE WEBSTER
Author of "Joretta," "Lipstick" & "Gilt Edge."

Camilia Hoy, young and beautiful, student in an art school, unconsciously sketches the head of a fellow student during class and when she is summoned to meet him, she is nervous. The professor, looking at the sketches, commends Camilia by having Peter Assange, the man who had been sketching, criticize her work before the class. Afterwards Camilia goes to the studio to thank Peter for his compliment, and he touches her shoulder. It turns out to be Peter, who is popular for his action and wit. Camilia, who has always adored him, makes a date to see her that evening but is afraid to go to the party because it is a social night club. It is far beyond his means but he resolves to go through with it. Peter, however, is not there first, and then to the night club where they meet some of Camilia's friends. (Now go on with the story.)

CHAPTER IV.

Peter danced with Camilia, his arms aching for Camilia. He felt clumsy now, and self-conscious. But Camilia took him home, and Peter was a mere welcome dancer. Mr. Assange is Peter's father.

"I'd never last that long. And I don't like to dance, anyway," he told her bluntly.

"Oh, you're all right. It's just that I don't like to dance."

"Then why do you bring Camilia here?"

"Because she wanted to come here, I believe."

"That's just like her. She gets everything's way."

"I suppose so. Why shouldn't she?" she asked reflectively.

"Peter, I think everyone seems to think. But she never troubles herself about making anyone else happy—any more," Camilia admitted.

"Has she changed—recently?"

"She's not much different. She sees me when she often lets. She doesn't play with the crowd like she used to, and she acts most of the time as if she were far away, when she is around."

"Perhaps she's getting serious about her life, trying to find some definite work. I met her at a late time."

"I know. She's been going for the intellectual stuff in a big way and cutting the rest of us. She is down-right smoky, lately," Camilia shrugged.

"Perhaps you just imagine it," Peter defended her. "Any kind of study takes a lot of one's time and mind, and she doesn't intend to high-tail it."

"You're pretty crazy about her, aren't you?" Camilia's eyes narrowed.

"Call me crazy if you like," he smiled.

"Well, she will treat you like a rest. Almost every fellow in our crowd has had his crush on Camilia, and his cure. They all get over it after she has kept them miserable for a week."

"What nice sharp claws our kitten has!" thought Peter, and replied, "That makes it nice for me, that she gave them all the gate, because I might be the exception to the rule."

Her eyes flashed sternly. "Take that for it."

But nothing daunted Camilia. "Well, if she's too cruel, bring

HORSES WORK BETTER

When feed from Saddle Hills, Cots, Eggs, Biscuit, Colic, etc., by Minard's Liniment, is fed to horses of Minard's in the stable as well as to the horses race track and board hills.

your wounds to me and I'll bandage them up for you. I might feel sorry for you because you're a nice boy. Heart wounds are serious."

"That's a lot, Miss Harris. You are very kind." She ignored the reply of his voice, and when they dined again, she was in gay laughter. Peter's eyes followed Camilia's lithe grace in Terry's arms, covetously. He grudged the loss of one moment with her, the more because he knew he would never dare to take her out again.

The supper order appalled him. Lucky he had brought the extra money. He was in for it, all right. His voice was hoarse with desire to have a time, and made a date with Camilia. She had scores of wealthy friends whom they could entertain everywhere. As her escort, he had to be prepared to act as host when she wanted to.

Passing her on the floor, he sang to her with the orchestra, "Save the last dance for me, sweetheart!" She was smiling. The last dance, he thought, must have, after perhaps, and wondered if she would care much if it were.

Terry returned to the table.

"The last dance," Camilia declared, a bright Peter invited to join his guests. "Ginger ale," he said, and apologized to Terry. "Eight o'clock class tomorrow and a headache won't go."

"Don't you have the grind?" drawled Terry, luxuriously sipping his high tea.

"Grind?" Peter exclaimed with surprise.

"Mr. Assange is one of those rare people who likes to use his brains."

Was she laughing at him. Peter wondered, and grew miserably. What Cathie was right. She was beginning already to punish him for his abrupt arrival.

The waiter presented two bills, one for the food and one for the drinks. The total astounded Peter, but he paid without a flicker of hesitation, and turned to him for another bill.

But when he took Camilia's name, he forgot his nerve, his faint bank balances that looked like super charges and upper charges that looked to him like the figures of a man.

The ride presented two bills, one for each of them, and will never return to British waters. The departure was the last sailing of a Hudson Bay Company ship.

It was the dashling Prince Rupert, the first Governor, who backed the first voyage of the Governor and Company of Adventurers of England Trading into Hudson's Bay and ever since ships have sailed from Britain to Canada with stores and provisions for the fur trade.

But the "Nasopie" is the last of them, and will never return to British waters.

The departure was the last sailing of a Hudson Bay Company ship.

It is estimated that the approximate number of thunderstorms occurring over the whole earth in the course of a year is 1,500,000.

This works out at 44,000 a day, and we make allowance for a short period.

Thunderstorms are the cause of death in Japan, unless he conveys his message with suitable circumstances.

It is likely to be ostracized as barbarian. But the negatives and difficulties are innumerable.

Camilia's eyes met his and he ordered him to leave. "Let that be a lesson to you," mocked the orchestra and the tenor soloist, in a sudden crescendo.

But when he took Camilia's name, he forgot his nerve, his faint bank balances that looked like super charges and upper charges that looked to him like the figures of a man.

L.O.D.E. and the sewing circle girls met at the home of Mrs. Harley Wilson on Wednesday evening for a social get-together and Miss Florence Fox, Mrs. Kathleen Watkins was the concert and a delightful lunch was served. The L.O.D.E. presented Miss Fox with a Lodge ribbon while the sewing circle gave her a picture.

Dr. Elkins of the Union Power Company, was a Carbon visitor on Saturday.

At a recent meeting of the Alberta Lawn Tennis Association held in Carbon, W. A. Braisher of Carbon was elected a councillor of that organization for the ensuing year.

The Duke of York chapter L.O.D.E. held a dance at the home of Mrs. McMillan on Thursday last in honor of the Queen's Silver Jubilee.

The ladies presented Mrs. Fox with a silver souvenir spoon, and during the afternoon a contest was held and of which Mrs. Evans was the winner.

The business grades a delightful tea to her guests.

High School Course by Mail

For some years the provincial department of education has conducted correspondence courses in the elementary grades at school for the convenience of those who could not attend school. Some 2500 or more children in outlying parts of the province have taken advantage of these. It is now the purpose of the department of education to extend these correspondence courses in all four grades of high school work, with the exception of commercial and technical courses. A small fee of \$8 per unit taken will be charged to cover administrative costs.

Summer School Attendance

A total attendance of 576 was recorded at the summer school's entrance examination at the end of the month of August. This compared with 931 last year. The school was operated jointly by the university and department of education.

To clean velvet or plush cloth it should be washed with down salt and then brushed with a soft brush.

A routine will keep hot iron on a place of waxed paper.

Knitted socks last longer if a silk or coarse crocheted thread is knitted with the yarn in the heel too.

To decorate cakes or fruit salads, quickly rub large soft soap down and with scissors cut them in thin slices. The slices will curl on like leaves and berries.

ternoon and is delivered on Thursday

EDOUARD J. ROULEAU
Editor and Publisher

DO CITY MERCHANTS PAY CARBON'S TAXES?

One of our local business men some time ago had the authority to claim that we were making excessive charges for job printing and that he could do better. We asked him to furnish a bill of fare for the year 1932. Our charges were \$4.35.

We don't usually name prices at any time—so we know the value of our work, but our local merchant over-estimated his bill of fare for the year 1932. His charges were \$10.00.

Now, the question is, who is right? Did I do well to think that we take \$4.35 and then some out of trade. The total cost of the newspaper is \$1.00 per issue. The price to the public would be \$1.50. \$1.25 sales tax plus 25¢ excess charges or \$6.18. He would get no one-day, or five-hour service on his work, as the case may be. He would get no repeat service either. The man who would get the most would be the distributor, who would refund his money.

But, then, who's all the controversy about competitive rates? How does the local merchant know there is a difference in Carbon, giving him lower prices? We should be doing the same in Carbon in every business sense, but why whatever he can in Carbon—he expects others to do it—especially when the prices quoted in other towns are higher. And, the ton of flour he is marketing back in trade and probably more.

Build up Carbon—not Caydon. When ever you think that Caydon values are greater than Carbon's—call me or write for your business to consider.

We believe a newspaper is a necessity to the welfare and advancement of any town—therefore we pay for the publisher, who of necessity must look to the job printing department of his plant to pay for the deficit that the newspaper shows each year.
